

## Pre-School Field Officer

The Pre-School Field Officer (PSFO) Program is an early intervention outreach service that is universally available within pre-school for any child with developmental concerns.

The primary role of the PSFO program is to support children with additional needs to access and participate in state funded pre-school services.

Support provided by the program includes:

1. Observation and assessment of children with developmental concerns, including those children who need a second year of Kindergarten.
2. Information provision to preschool staff, parents and committees of management.
3. Consultancy support to preschool staff on the planning, implementation and review of developmentally appropriate programs.
4. Referral for more specialised assessment for children, and linking families to a range of community supports.
