Strategic assessment of the Amendment

Why is the Amendment required?

The scale and density of development approved and currently being proposed along the Fitzroy/Collingwood Activity Centres has increased substantially in recent years. Many current proposals in the area exceed the scale of development envisaged by the current planning scheme provisions in the area.

To ensure appropriate and orderly planning, the Yarra Planning Scheme needs to be urgently revised to better facilitate and guide the scale, massing and bulk of new development.

The Fitzroy/Collingwood Activity Centres are comprised of four retail high streets, with both east-west and north-south axis's. Diversity and variation of heritage building stock is an inherent characteristic of each centre. Built form guidance is urgently needed to ensure future development responds appropriately to these unique characteristics and to achieve an appropriate balance between the existing character and potential development.

The current provisions do not provide sufficient guidance to ensure development appropriately considers the impacts on the heritage qualities and diversity of built form within the Fitzroy – Collingwood Activity Centres. Nor do the provisions provide sufficient guidance to safeguard appropriate amenity for current and future residents in the area. An interim DDO will assist in protecting against inappropriate development and significant heritage character of the activity centre whilst the normal amendment process progresses.

The interim controls provide design objectives and requirements which seek to improve the quality of development in Yarra's major and neighbourhood activity centres. Building height and setback requirements (a mix of discretionary and mandatory) seek to achieve development that respects residential heritage and neighbourhood character.

The interim controls are required to ensure that the Activity Centres are protected in the short term, and that planning controls provide certainty to the Yarra community while further work is undertaken. A lack of existing built form controls has and can result in inappropriate built form outcomes.

An exemption will enable a prompt decision to be made on the adoption and approval of the amendment, which will protect the Fitzroy/Collingwood Activity Centres from inappropriate development in the short-term.

How does the Amendment implement the objectives of planning in Victoria?

The amendment implements the following objectives of planning in Victoria (sections 4(1) and 12(1)(a) of the Act):

To provide for the fair, orderly, economic and sustainable use, and development of land.

To secure a pleasant, efficient and safe working, living and recreational environment for all Victorians and visitors to Victoria.

To conserve and enhance those buildings, areas or other places which are of scientific, aesthetic, architectural or historical interest, or otherwise of special cultural value.

To protect public utilities and other assets and enable the orderly provision and co-ordination of public utilities and other facilities for the benefit of the community.

To balance the present and future interests of all Victorians.

The amendment seeks to provide greater clarity regarding built form outcomes and expectations in Yarra's Major and Neighbourhood Activity Centres in Fitzroy and parts of Collingwood. In doing so, the proposed provisions will support more efficient and orderly planning processes. The application of interim controls will ensure that Council and the community's vision for Yarra's activity centres are not undermined by inappropriate developments, while permanent controls are implemented. The views of all affected parties will be sought through planning scheme amendment processes to implement permanent controls.

The amendment implements provisions that support the protection of heritage and neighbourhood character values in the activity centres, in both commercial and residential areas. The amendment seeks to provide greater clarity as to whether growth or heritage values should drive development outcomes.

How does the Amendment address any environmental, social and economic effects?

The Amendment is consistent with the overarching goal in the planning scheme to:

Integrate relevant environmental, social and economic factors in the interests of net community benefit and sustainable development.

The Amendment will have positive social and economic benefits through the facilitation of well-designed buildings accommodating housing above commercial activity situated in an activity centre that is well served by public transport and services.

Does the Amendment address relevant bushfire risk?

The amendment does not address bushfire risk, as the land subject to the amendment is not:

- Subject to a Bushfire Management Overlay;
- Within a designated bushfire prone area;
- Proposed to be used or developed in a way that may create a bushfire hazard.

Does the Amendment comply with the requirements of any Minister's Direction applicable to the amendment?

The Amendment complies with Ministerial Direction No. 9 in addressing and responding to the metropolitan planning strategy, Plan Melbourne.

The Amendment complies with the Direction on the form and content of planning schemes.

Amendment C270yara is consistent with the following Directions contained in *Plan Melbourne 2017-2050*:

Direction 1.1 - Create a city structure that strengthens Melbourne's competitiveness for jobs and investment, which seeks to strengthen the competitiveness of Melbourne's employment land.

The Amendment provides appropriate policy direction for the planning and development of the Bridge Road Centre to ensure that the activity centre continues to meet community needs.

Direction 5.1 - Create a city of 20-minute neighbourhoods which aims to cluster new housing in activity centres and other places that offer good access to jobs, services and public transport and includes policy for local governments to prepare structure plans for activity centres to accommodate growth. Does the Amendment make proper use of the Victoria Planning Provisions?

The Amendment makes suitable use of the Victoria Planning Provisions (VPP) through the selection of appropriate tools to achieve guidance for future land use and development outcomes for the precinct.

The amendment also addresses the requirements of Planning Practice Note 29: Ministerial Powers of intervention in Planning and Heritage matters, November 2004. The Practice Note states that the Minister would intervene where the matter will be the introduction of an interim provision or requirement and substantially the same provision or requirement is also subject to a separate process of review (such as the introduction of permanent controls in a planning scheme).

How does the Amendment address the views of any relevant agency?

Council sought the views of the Department of Environment, Land, Water and Planning (DELWP) in the drafting structure plan which informs the Amendment.

Further views of relevant agencies will be sought during exhibition of the Amendment for permanent controls following the anticipated resolution from Council in December 2019.

Does the Amendment address relevant requirements of the Transport Integration Act 2010?

The Amendment is consistent with the requirements of the *Transport Integration Act 2010* and will facilitate development outcomes that promote the principles of transit oriented development.

Particular consideration has been given to ensuring that vehicular movements do not impact on the Principal Public Transport Network.

Resource and administrative costs

- **What impact will the new planning provisions have on the resource and administrative costs of the responsible authority?**

The Amendment will have some impact on the general operation of Council's statutory planning department as it will facilitate some new forms of development and land use.

The application of planning controls is considered to provide a more consistent assessment of planning permit applications. This is considered to ultimately reduce costs by providing more certainty.
