

Potential Contamination of Sites in the Swan Street Major Activity Centre: Historic and Current Land Use Assessment Matrix

Assessment Matrix Legend

A. Require an environmental audit as required by Ministerial Direction No. 1 or the Environmental Audit Overlay when a planning scheme amendment or planning permit application would allow a sensitive use to establish on potentially contaminated land.
An environmental audit is also strongly recommended by the SEPP where a planning permit application would allow a sensitive use to be established on land with high potential for contamination.

B. Require a site assessment from a suitably qualified environmental professional if insufficient information is available to determine if an audit is appropriate. If advised that an audit is not required, default to C.

C. General duty under Section 12(2)(b) and Section 60(1)(a)(ii) of the Planning and Environment Act 1987.
